Quick setup — if you've done this kind of thing before

[⊞ Set up in Desktop] or [HTTPS] [SSH]   `https://github.com/dheeraj9805/Working.git`   📋

Get started by [creating a new file] or [uploading an existing file]. We recommend every repository include a [README], [LICENSE], and [.gitignore].

...or create a new repository on the command line

```
echo "# Working" >> README.md                                              📋
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/dheeraj9805/Working.git
git push -u origin main
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/dheeraj9805/Working.git           📋
git branch -M main
git push -u origin main
```

```
dhirajyadav@dhirajs-MBP WGU % git clone git@github.com:dheeraj9805/Working.git

[main (root-commit) 2e7e284] Modified file1.html with changes X
 Committer: dhiraj yadav <dhirajyadav@dhirajs-mbp.mynetworksettings.com>
Your name and email address were configured automatically based
on your username and hostname. Please check that they are accurate.
You can suppress this message by setting them explicitly. Run the
following command and follow the instructions in your editor to edit
your configuration file:

    git config --global --edit

After doing this, you may fix the identity used for this commit with:

    git commit --amend --reset-author
